

SAFEasy™ TYPE 2 LIGHT CURTAINS

SAFEasy™: safety in your hands

- **Integrated light curtain for HAND PROTECTION**
- **Maximum operating distance reaching 19 m**
- **Controlled heights ranging from 150 to 1800 mm**
- **New sturdy profile and rotating brackets**
- **Selectable Manual/Automatic Restart, EDM and Anti-Interference**

SG2-HAND SERIES

The new **SAFEasy™ SG2** light curtains represent the natural evolution of the SF2 series.

The new **SG2** series offers two models, **SG2-B “Base”** and **SG2-E “Extended”**, thus guaranteeing maximum compatibility with the SF2 series (**SG2-B**), as well as offering advanced functions for a Type 2 safety light curtain, such as EDM and Anti-Interference (**SG2-E**). Models with controlled heights ranging from 150 to 1800 mm are available, all with an operating distance reaching 19 m. The response times ranging from 8 to 24 msec result to be amongst the lowest on the market, consenting the installation of the product nearer to the dangerous area.

As well as offering the base functions present in the **SG2-B** model, the **SG2-E** series integrates advanced functions for a Type 2 device such as manual/automatic Restart, EDM function, Anti-interference system (obtained thanks to the reduction to 9 m of the maximum operating distance). All selectable functions.

The new profile and rotating fixing brackets ease installation and the alignment of the emitting and receiving units, even at long distances and in applications with deviating mirrors.

The **SG2** series represents the ideal solution for all the typical applications of a Type 2 safety light curtain.

The characteristics introduced by the SG2 safety light curtains are:

- Operating distance reaching 19 m
- Wider controlled height range (reaching 1800 mm)
- Reduced response times, 25% less than SF2
- New sturdy and more functional profile
- Easier and quicker installation thanks to the new rotating fixing brackets that ease alignment even in the harshest conditions
- SG2-B 100% compatible with SF2
- SG2-E with selectable PLUS functions, such as Manual/Automatic Restart, EDM and Anti-Interference thanks to the reduction of the maximum operating distance from 19 to 9 m

TECHNICAL DATA

ELECTRICAL DATA

Power supply (Vdd):	24 Vdc \pm 20%
Consumption (emitter):	2 W max
Consumption (receiver):	3.5 W max (without load)
Outputs:	2 PNP
Short-circuit protection:	1.4 A max
Output current:	0.5 A max on each output
Output voltage - ON status:	Vdd - 1 V min
Output voltage - OFF status:	0.2 V max
Capacitive load:	2.2 μ F @ 24 Vdc max
Response time:	Refer to table
Controlled height:	150...1800 mm
Safety category:	Type 2
Auxiliary functions:	
SG2-B	Reset / Test Automatic Restart
SG2-E	Reset / Test Man./Auto Restart Selectable EDM Class I / Class III
Electrical protection:	
Connections:	
SG2-B	M12 4-pole for emitter M12 5-pole for receiver
SG2-E	M12 4-pole for emitter M12 8-pole for receiver
Cable length (for powering):	50 m max *

OPTICAL DATA

Light emission:	Infrared LED (950 nm)
Resolution:	30 mm
Operating distance:	0.2...19 m (SG2-B) selectable 0.2...9 m / 0.2...19 m (SG2-E)
Aperture angle (EAA) :	\pm 5°
Ambient light rejection:	IEC-61496-2

MECHANICAL AND ENVIRONMENTAL DATA

Operating temperature:	0... + 55 °C
Storage temperature:	- 25...+ 70 °C
Temperature class:	T6
Humidity:	15...95 % (non condensating)
Mechanical protection:	IP 65 (EN 60529)
Vibrations:	0.35 mm amplitude 10 ... 55 Hz frequency, 20 sweep per axis 1octave/min (EN 60068-2-6)
Shock resistance:	16 ms (10 G) 1.000 shock per axis (EN 60068-2-29)
Housing material:	Painted aluminium (yellow RAL 1003)
Protective shield materiale:	PMMA
Cap material:	PC MAKROLON
Weight:	1 kg / m

* If a longer cable has to be used, please verify that the capacitive load specifications are respected

NEW FEATURES INTRODUCED

The **SG2** safety light curtains present some new important features:

■ Increased operating distance

The 19 m operating distance makes the **SG2** safety light curtain the ideal device for plants with large dimensions, as well as guaranteeing improved flexibility in applications with deviating mirrors.

■ Controlled height range extended from 150 to 1800 mm

The controlled height extended to 1800 mm allows SG2 to be used in applications where high areas have to be protected.

■ Response time reduction

The SG2 light curtain can be installed even closer to the dangerous area thanks to improved response times, thus reducing the machine dimensions and consequently the plant costs. Moreover, SG2, as are as the response times are concerned, can be interchanged with the corresponding products of the major manufacturers.

SG2-E: PLUS FUNCTIONS

EDM

The EDM function allows to connect the light barrier to a couple of simple forced-guided safety relays instead to a Type 2 safety relay and thus guaranteeing an enormous economical advantage.

Anti-Interference system

The Anti-Interference system consents the installation of different light curtains aligned one next to the other avoiding mutual optical interference, without the need to install separating shields.

APPLICATIONS

The SG2 safety light curtains provide solutions in all automation fields where the access to dangerous areas has to be controlled.

In particular, the safety curtains can be used in stopping moving parts in:

- Automatic machines;
- Packaging, material handling and storage machines;
- Textile, wood-working and ceramic machines;
- Automatic and semi-automatic assembling lines;
- Automatic warehouses.

Example 1: Hand protection on forming machine

The aim is to prevent the squashing of operator hands during stacking operations. The solution must not interfere with the production process.

Solution: the IP69K protection is obtained through an acrylic PMMA tube and offers an effective protection without trapping dirt or contamination. The cap prevents water or dirt from entering the tube and at the same time, prevents also internal condensation. The cable connection is protected and fixed by a PG gland that prevents water or dirt from entering the tube.

Advantages: the profile dimension and rotating fixing bracket resolve typical applications that require fixing in reduced space, guaranteeing maximum installation flexibility and adaption to the machine dimensions.

Example 2: Cooling and air-conditioning systems

Cooling and air-conditioning systems as well as devices and components for auto vehicles are controlled inside a machine to check leaks, using a helium-based spectrometer. The point where the components are positioned in the measurement room has to be protected in full compliance with Type 2 requirements, guaranteeing space reduction and the safe access to a protected area.

Solution: the SG2 light curtain represents the best solution considering the safety requirements and the application. The test machine is immediately stopped even when only one of the beams is interrupted.

Advantages: the SG2 light curtain satisfies the customer needs in terms of access simplicity in presence of a machine stop. Easy installation, configuration and use are other advantages.

Example 3: Automatic warehouses

The SG2 Type 2 light curtain represents the ideal solution to protect the operator from hand squashing, abrasion and loss, or parts of it due to the moving parts.

Solution: the SG2 light curtain represents the best solution considering the safety requirements and the application. The carousel is immediately stopped even when only one of the beams is interrupted.

Advantages: the profile and fixing systems ease and speed up installation. The excellent performances (operating distance, controlled heights and response times) guarantee maximum plant flexibility.
