Melamine. For circuits having high fault. 100,000A10 (KLKD's have d-c rating of 500V, 0-30 Amps CSA Certified, 0-10Amp U. L. Listed, 12-30 Amp 600V U. L. Listed).	KLK-R KLK with re-jection feature. U. L. Glass 00. Branch circuit fuse. 200,000A10.	For circuits with high inrush currents. 10,000A10 For motor control transformers Circuit with inrush current 10,000A10, 250V U. L. Listed.	For motor control transformers. Circuits with inrush I ^a = 200,000A10. Single element above 3 ^{1/2} A.	Ideal for Control Transformer Protection UL Glass 00 CSA HRCI-Misc.	BS1362 IEO 269-3A 6000A10.	Intended for use in plugs, and socket-outlet adaptors to BS546 (BS1363/3) for two wire circuit of which the declared voltage does not exceed 250 volts a. c. at 50 cycles per second, 250 volts d. c.
