APPLICATION NOTES

External capacitance

These converters will work without external capacitors, in order to guarantee the full parametric performance over the full line and load range we recommended you to use the value we listed at right side. All parts have been tested and characterized using the following values and test circuit.

Value		
Input Voltage(V)	CIN	COUT
5 & 12	100uF,25V	100uF,25V
24 & 48	10uF,200V	100uF,25V

Test Circuit

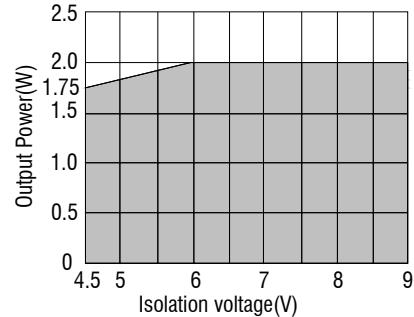

Pin 8 (CS)

This pin provides a connection point to the main internal reservoir capacitor. Additional capacitance can be added between pin 8 and pin 7. Any lower ESR capacitor will remove ripple and noise.
