

Type CS (Capstick®) Metallized Polymer Network

Radial Multi-pin Metallized Polymer Network for DC to DC Converters

The Type CS multi-pin metallized polymer network is ideal for the low ESR/ESL requirements in DC to DC converters and switching power supply applications. This unique, robust, capacitor design offers high ripple current capability and high capacitance in a small package. It is available with straight pins on 0.10" centers for through-hole mounting or with gull wing leads for surface mount assembly. Type CS (Capstick®) is encapsulated in a rugged conformal coating and is packaged in anti-static tubes for easy handling.

Highlights

- ◆ Rugged conformal coated case meets UL94V-0
- ◆ Low ESR/ESL
- ◆ High ripple current
- ◆ High capacitance in a small package
- ◆ Non-inductive design
- ◆ Non-polar
- ◆ Surface mount or through hole assembly
- ◆ Multi-pin leads on 0.10" centers
